

Tutorial 2 Quick Check Answers

Session 2.1 Quick Check

1. Inline styles are styles that are applied to a specific element using the style attribute. Embedded styles are added to a specific HTML file using the style element in the document head. External style sheets are external files containing CSS style rules that are linked to an HTML file or files. To provide designs for an entire website, use external style sheet files.
2. !important
3. /* Tri and Succeed Sports Color Styles */
4. blockquote {color: rgb(255, 0, 0);}
5. address {color: black; background-color: hsl(90, 100%, 50%);}
6. A technique by which the latest style properties are listed last in the style rule so that older browsers are supported by the older standards and new browsers can still take advantage of the newest standards.
7. color: rgb(232, 121, 50);
8. h1, h2 {background-color: rgba(255, 255, 0, 0.7);}

Session 2.2 Quick Check

1. footer > address
2. h1#top {font-family: 'Century Gothic', Helvetica, sans-serif;}
3. 18px
4. body {font-size: 2vw;}
5. nav a {text-decoration: none;}
6. @font-face {
 font-family: Cantarell;
 src: url(cantarell.woff) format('woff'),
 url(cantarell.ttf) format('ttf');
}
7. blockquote.Reviews {
 font-style: italic;
 text-indent: 3em;
}
8. h1, h2, h3, h4, h5, h6 {
 text-align: center;
 font-weight: normal;
}

Session 2.3 Quick Check

1. ul {list-style-type: lower-alpha;}

2.

```
ul {  
    list-style-image: url(star.png);  
    list-style-position: inside;  
}
```
