

Extra Practice with Forms (optional)

Tutorial 7: Creating Web Forms

For extra practice, complete the following. Then compare your work to the solution files found in the *Extra practice with forms* folder.

Complete Tutorial 7, skipping some steps:

Use the files in the data files folder called *data files/html07/tutorial*. Make a copy of the tutorial folder so that you have an original copy to go back to, if needed. Complete the steps at the computer using Komodo Edit or other editor of your choice.

You will be doing only some parts of Tutorial 7. You will skip the steps for making the three form controls, range slider, spinner and datalist. As you read, complete all the orange colored steps in the e-text (and all the steps in the brown boxes in the physical book).

If you are using the **Cengage MindTap reader e-text**, read and complete the orange numbered steps of the entire Tutorial 7 skipping the following sections:

- skip 7.12b
- skip 7.18 through 7.19, inclusive
- skip 7.21c through 7.22b, inclusive

If you are using the **physical book**, read and complete the steps in the brown boxes of the entire Tutorial 7 skipping the following pages. And in **other non-MindTap reader e-texts**, complete the black colored steps in the entire Tutorial 7 skipping the following pages.

- skip pp535-536
- skip pp548-555
- skip pp562-570

The pages you are skipping correspond to these topics:

- Session 7.2 (Form Widgets) -optgroup element of the select element, spinners, range sliders, data lists;
- Session 7.3 (Data Validation) - pattern element, data validation using field length, inline validation.

To learn about form tools, read the ProSkills box in section 7-22b (p569 of the textbook). You have access to the form tool **Microsoft Forms**. If interested, to access the app, go to MyECC and click on the waffle menu (with the dots) in the top left corner that looks like:
